# Commodore's Corner

2018 has been a fantastic year. Our class is stronger than ever. Over 50 new boats will be built this year and I know of at least 2 people at my club who are planning to order new boats. Our sanctioned events in Indianapolis and Pewaukee were fantastic and our membership is strong. Although we are coming to the end of the year, life is good.

I would like to thank our Board of Governors and welcome our incoming Commodore, Dan Fink, of Little Muskego Lake, Wisconsin. That means that I will be moving on to be the Rear Commodore. Dan has selected his Vice Commodore, Scott Harestad, of Spring Lake, Michigan.

At our class meeting at the National's we voted in three new board members. Al Haeger, of Lake Beulah, Wisconsin; Scott Harestad, of Spring Lake Michigan; and Ron Hall, of Lake Monona, Wisconsin. I would like to thank them in advance for their service to our class.

As I write this, we are preparing for the Blue-Chip and winding down our season. Sail fast in your remaining races, and I hope to see you all at our Regional Regattas.

Regards,  
Richard Blake  
Commodore

# Meet the Board of Governors

**Richard Blake** lives in Galloway, Ohio, a suburb of Columbus, Ohio, and Sails out of Hoover Sailing Club. Richard is married to Tracy, and is a father to three girls and a grandfather to two grandchildren. Richard is a Director in the Legal Department of the Ohio Bureau of Workers' Compensation. Richard currently sails MC # 2161.

**David Helmick** is a MC sailor since 2009, and a longtime Florida one design and off shore sailor. He's the current Commodore of Lake Eustis Sailing Club and often accompanied by his lovely wife Nancy.

**Joe Friction** is married to Jenny, and has two boys, Lucas and Charlie. Joe lives in Minneapolis, Minnesota, and sails on Lake Harriet, He is currently working on growing team racing in the MC fleet. Joe learned to race at the University of Iowa, and is now teaching his love of sailing to his boys. Off the lake, Joe is an attorney representing dental practices and other small health care businesses.

Mike Keenan started sailing in 1958 with his brother Tom on Spring Lake in a pram with an oarlock on the transom and a skate sail. In the early 1960's we crewed for our Dad on his C Scow and soon thereafter Dad found himself off the boat. In the early 1970's Dad hopped into an MC and Dad and Mom became founding members of the MCSA. Following a career as a carrier-based Naval Aviator, President of a lighting company, husband to Carol, and father of four.....I purchased my first sailboat, MC 2010. I regained my sea legs as a member of the Hoover Sailing Club and have been active on the regatta circuit for the past seven years. I truly enjoy the friendships, comradery, and competitive spirit found in the MCSA, and I look forward to the opportunities of promoting and enhancing MCSA membership.

**Andy McDonald** grew up sailing at the Indianapolis Sailing Club. After participating in a few different classes, he decided to campaign a Thistle for many years all around the country. In 2000 he was fortunate enough to win the Highlander Class National Championships. As an empty nester with three sons out in the world, Andy discovered sailing again through the MC Scow. His first MC Scow race was Race #1 at the 2015 Nationals and he has made several MC regattas since and is a driving force in the new fleet in Indy.

**Stefan Schmidt** originally from Shorewood (Milwaukee), WI. I started sailing as an X boat crew for renowned M-16, MC racer and ILYA/national race officer, Bill Best on Big Cedar Lake, WI around 1960. Many years later (mid 80s) I started skippering, getting hooked on Badger Tech racing at Hoofers Sailing Club in Madison, WI where I now live with Kristi Betts (often seen with her bright green kayak at regattas on the circuit). I have owned and raced Lasers, Windsurfers, M-20s, I-20s, E scows and served as Mendota Y.C Commodore in 2001. The MC fleet (since around 2010) is my primary home for racing now. I am so impressed by the joyful and generous spirit of this class and am thankful to all who have helped me try to improve. Where else can someone compete in large venues in all regions of the country against all levels of racing ability?

**Dan Fink** aka "Squad Car."

# History of the Scow Documentary Film Project

Buddy Melges and Woody Woodruff

By Woody Woodruff

The history of the scow type sailboat began 120 years ago on the lakes of the upper Midwest, where boat builders developed a revolutionary new flat bottom design that flew across the smooth waters of the inland lakes. As scow fleets have grown, together with scow fraternal and racing organizations, and scow boat design has been refined over the years, scow

**"Scow sailing is rich in history and tradition and it is important to document this and share it with our future generations of sailors."**

**Harry and Buddy Melges**

sailing has become an important recreational and community activity for lake sailors not only in the Midwest but throughout the United States.

With some of the historic legends in scow boat building, management and racing still alive, the time is right to produce a full length one-hour documentary about the boat, its history and its future.

Filmmaker and MC sailor Woody Woodruff, along with ILYA historian Dr. Tom Hodgson, are collaborating in an ambitious effort to bring this story to the screen. Woodruff is an award-winning filmmaker from Colorado and avid scow racer. Dr. Hodgson has been a part of the scow world for many decades as past Commodore of the Inland, current Chair of the Appeals committee, the author of "The History of the ILYA and member of the ILYA Hall of Fame. Together they have produced a 10-minute sampler of the 1-hour program which can be viewed at [www.woodrufffilmco.com/sample](http://www.woodrufffilmco.com/sample).

In the mid 1890's, the concept of a sailboat that goes over the water rather than through it, came down from Canada to White Bear Lake. Although there were a number of White Bear boat builders working on the concept, John O Johnson is credited with putting it all together and launching the first true scow in 1900. Lake after lake had fleets of scow type boats racing and an organization was needed to give structure to scantlings of the boat and regulation to the inter-lake competitions. On August 24, 1897, The Inland Lake Yachting Association was born and has overseen the fleets ever since.

Although scow racing began as a diversion for the wealthy, the sport evolved into a more egalitarian one when, in 1935, the Bilge Pullers were formed as a fraternal organization to expand the social aspects of scow racing. Families started to pass the scow sailing traditions from generation to generation.

**"Having seen your presentation, we want to share that the MC class supports your project. You have identified and understand the need to preserve our history and Scow content in a film that will help educate scow sailors, young people new to our classes, and our current membership."**

**Richard Blake, Commodore MC Sailing Association**

Scow dynasties were formed that continue today.

Through this history, the boats themselves evolved. From 16' to 38' each scow class was born and evolved to perform in their own unique way. Today the E and A boats are competing with modern Asymmetrical spinnakers and carbon fiber components. But the real strength of the scow is how the fleets have not only survived all these years but how they have become some of the largest and strongest sailboat racing organizations in the country. Moreover, in the development of the scow culture, a "friendly but competitive" spirit has reigned.

The film will interview historic boat builders and racers and showcase historic footage and photographs. In addition, there will be coverage of scow racing, prominent historic scow families and scow organizations.

The production is fortunate that Cameraman and scow sailor David Thoreson, [www.bluewaterstudios.com](http://www.bluewaterstudios.com), and editor/soundman Tyler Wells, [www.alpenglomidia.com](http://www.alpenglomidia.com) have agreed to work on this

film. To date the project has raised over \$30,000 in pledges. But to complete the 1-hour production as planned, we will need to raise another \$95,000 in addition to the \$20,000 of seed money spent so far.

When the program is finished it will be provided free to Yacht Clubs, sailing schools and all interested sailors. In addition, the show will be packaged as a 1-hour television special for distribution on network, cable and the internet.

This film needs the commitment and direct support of the scow fleet. Individuals that are interested in becoming part of this endeavor are encouraged to pledge a tax-deductible donation. All financial sponsors will become partners and receive recognition in the film's on-screen credits.

The clock is ticking. Many of the "Old Salts" of the Scow world are still around to tell their part of the story, but we don't know for how long. Now is the time to tap into this wealth of scow knowledge while it is still available. It is the time to step up and become part

of this project. For your fleet, your children and for your own piece of history.

If you have any questions about the project, have an idea that you think might help the story or you want to make a pledge and become a recognized partner of the program, contact:

## MCSA Nationals Recap

### Fleet 38 - Pewaukee YC, WI, August

By Bill Draheim

The 2018 MC Nationals were at Lake Pewaukee Yacht Club with 83 boats showing up for a wonderful event. The first day of scheduled races the forecast didn't look great. Our class is trying to do a good job calling off racing when sustained winds are above 20 mph or gusts are above 23 mph as our class rules dictate. For those of you who weren't at the Midwinters, we sailed in a race where the final beat felt like it went over the limit which impacted the overall fleet fun factor.

Mary Anne and I went out for the first race and the wind was out of the south across the narrow end of the lake which made for puffy conditions. To add to the puffy conditions, the forecast was for winds between 15 and 30 building as the day went on. We got the start of the first race off just fine but by the second

weather mark the puffs were over the wind limit. Although we didn't personally experience the biggest puffs, others on the race course certainly did. The puffs and lulls were very isolated. We were sitting in about 5th when they called the race off at the second weather mark. To our good fortune, the weather mark was very close to the club so it was a short dash to our mooring ball. The winds only built from there so that was it for day one. If there was any lesson to be learned from that race it was to have the mainsheet in your hand 100% of the time for immediate trimming and easing. The velocity differential between the puffs and lulls made the race very exciting.

Day two of the regatta, the winds shifted to the right and we were sailing down the long direction of the lake. I thought the winds were 8-13 mph out of the southwest. I am one of the smaller skip-pers and some of the bigger guys thought

the winds were more in the 5-10 range. Maybe they were right but I felt over-powered at times during the day and did have my traveler all the way down at some point in all three races. I thought the conditions were great. They allowed for shifts to develop from both the right and the left. Playing the shifts was critical.

The first race was set up so the race course was a little more towards the left shore at the top end. It was between the left shore and an island bringing the mark pretty close to the left shore. As a result, there were more port lifts as you got closer to the weather mark. I was running 3rd or 4th most of the race but I missed the last big left shift up the last beat and dropped all the way down to 12th. The lesson learned was to keep a positive attitude when something like that happens. With a fleet of 83 and the race course pretty condensed, you're going to lose more boats on a given shift than in a

smaller regatta. I wasn't upset at all after that finish because I knew it would be easy for anyone to lose boats on a shift the remainder of the regatta.

The next race the wind moved slightly to the right and the weather mark got a little bit further from the left shore. I got a great start in the middle of the line and didn't have anyone close on my wind-ward hip which is always a huge benefit because you want the freedom to tack to port in the first starboard header. I hit the shifts up the first beat and rounded 4th or 5th. Downwind I seemed to always pick up boats. With 83 boats on the race course it's really easy to look behind and see where the pressure is coming from. People have a tendency to reach high when boats are in front of them in an effort to take their air and when that happens, you miss the opportunity to sail low when the puff hits. I did a good job keeping my air free from the boats behind

me by both digging really low when a puff hit and by gybing when a shift came through. Remember to sail low when you're in velocity. I kept picking off boats the remainder of the race and ended up winning after defending a pretty good tacking duel approaching the finish. I had to hold off one of those fast 20-something sailors and he nearly got around me.

After lunch we went out for race three and the wind had slightly clicked more to the right. This time the weather mark was to the right of the island and had probably moved 10 degrees from the beginning of the day. I started just underneath the mid-line boat and typically that is a great place to start. The boat on the weather side of you ends up being really far from your weather side because he has to clear the mid-line boat and the anchor line. Not long after the start, starboard tack was headed and I tacked to port. Early in the leg, a number of boats on the left of

me were ahead because of the port lift. I kept sailing until I got a good header and tacked to starboard. At the weather mark I probably had a 20-boat length lead on the next boat. On the second beat, I got a little nervous with wind coming off the left shore and ate a starboard header to get to the left. It ended up being a stupid move. I should have continued sailing on the lifted tack. Two boats got around me from the right and I finished 3rd. At the end of the second day, we were tied with Ted Keller for first but ahead on the tie-breaker.

The next day, the breeze never developed and I don't know if anybody else was happy about that but we sure were. All in all, it was a great regatta. It was refreshing to see four of those young MC sailors in the top 10 showing that there will be strength in the class for years to come. There were a number of new boats on the line as well – the new design looks great!

# Regatta Results

## The 2018 MC Scow National Championship

By Eric Hood

This week we held our annual National MC Championship at one of the best scow lakes and clubs in the U.S. Pewaukee Yacht Club (PYC) is known as a platinum standard for hosting great regattas once again pulled out all the stops for our 83 teams racing this year.

If you look up the word hospitality in the sailing dictionary it would say PYC. Incredible food all morning, noon, evening for all four days of the regatta. At every turn, food, getting your boat in and out, buoys in and out, trailer parking, Lou Morgan’s famous Rib night was all spectacular. Seems like they had at least 75 volunteers in the total mix, maybe more.

### The 2018 MC Nationals Regatta Team Leaders

Lesa Gutenkunst – for leading all things MC Nationals. Thanks for your attention to the details, it was impressive!

Mary Carol Deguire for leading a great team who kept 200+ folks fed and happy for 4 days!

David and Sherri Perrigo – for your hospitality finesse landing folks fantastic housing on the lake for competitors!

Registration With Smiles – Nancy Niedziela, Jan Buckley and Lori Peterson!

Sponsorship – Tim O’Malley found a fantastic group of businesses helping make the regatta happen!

PRO – Chip Mann and his crew alongside a fantastic full team from PYC running our races!

Launch team – a ton of people using their organization and strength helping us in and out all week!

On to some sailing now.

The Regatta – The National Championship has a slightly different

format than our normal regattas. It is a scheduled seven race series with a drop race included if you get to seven races.

Our practice day saw some fantastic southwest breezes with nice temps in the high 70s on Thursday.

About 30 boats raced in the 3 p.m. practice race and about 45 boats made it out at one point or another to practice. 67 of the 83 boats were launched, in the water and on buoys by 6 p.m. with the rest arriving late and also early on Friday morning.

For Friday we had a very unusual weather pattern upon us. Cold in the 60s and south winds. Even the locals were scratching their heads saying we have not seen this one before in August. The whole upper Midwest was both unstable with converging weather systems and storms. We had big winds but very manageable going into race 1 at 10 a.m. on Friday. The race started on time with winds up and down between 10 and 20 mph. A WA3 was posted for our course. During race 1 on leg three, several times the PRO and other RC boats were getting big shots above our 23 mph max wind limit and also at one point had a max 35 mph gust reported.

As the top ten boats rounded mark 3 and were heading downwind the PRO and RC team abandoned this race. Winds increased throughout the day and all racing for Friday (three races) was lost. It was fun for all the crews to sail. Some of the big single-handed sailors like Devon Howe were loving it though for this one (he was in the top ten) until it was abandoned.

### The Sailors

83 teams sailed which was great with 10 teams signing up in last five days before the regatta. We had folks from Canada, New York, Florida, Texas, Minnesota, Colorado, Illinois, Michigan, Indiana,

Iowa, and Wisconsin sailing at this year’s championship. The talent was deep in all categories. It was so much fun to sail with so much talent. From the first sailor to the last sailor it was amazing how engaged everyone was, trying their best, prepping, practicing and more. It showed me the health of our class as they represented their fleets!

### The Results

We lost day one of racing which means the series would be a max 5 race series with 3 races on Saturday and 2 on Sunday weather permitting. It was tough for the PRO and team but they pulled off three good but very challenging races in the shifty southwest winds on Saturday. Velocity ranged from 5 - 14 mph. Going into Sunday you had several positions where big things could happen. 1st through 3rd could have flipped positions easily. 4th through 15th maybe deeper could have flipped. Then even deeper into the group there were individuals that could have easily gained or lost 15 boats by racing on Sunday with no drop race to be included. The wind however did not cooperate and we ended with no racing on Sunday. The regatta had it’s 3 race minimum in and we had a new champion.

This must have felt like ground hog day for Bill Draheim and Ted Keller as they once again tied for first this year. They tied earlier in the year at MC Masters Championship. Bill also tied for first with Scott Harestad and Rob Seidelmann at the MC Midwinters Championship. Bill won the tie-breakers at Lake Eustis, Indy, and then again at Pewaukee to complete a sweep of the three largest championships of the MCSA.

So great sailing to both of these skippers and their crews for finishing in a tie for first. As Bill joked at the PYC awards he appreciates the rules committee of our sport for their hard work on tie-breakers.

Orlando Web Regatta

Fleet 14 - Missouri YC, MO, June

By Bill Draheim

This year's Orlando Webb Memorial Regatta at Lake Lotawana was a great success. On Friday night I ran a "Go Fast" clinic with about 45 people in the room. Saturday morning 30 boats lined up for a beautiful day of racing. Wind came down the long direction of the lake from the North. It was windy enough to sail all 4 races with Mary Anne Hopper and we did a good job hitting shifts. We won three of the four races. I think a key was not to start too close to the left side of the line or sail too long on starboard toward the left side. The shorelines at

Lake Lotawana are pretty high so getting too close to a windward shore gets you into lighter air. The left shoreline was the windward shoreline on that day. The race we did not win went to J.P Bordes. We fouled Chris Brooks at the weather mark and by the time we got ourselves sorted out, we decided to drop out and rest up for the following race. At the end of day one, Chris Brooks was leading the regatta – he sailed a great first day!

Sunday morning the winds moved left which sent us to a part of the lake that runs more east/west. With this setup the right shoreline became the windward shoreline so the key was to not get too

close to the right shoreline. The down-wind legs were mostly port tack broad reach. You had to be very disciplined about not reaching up and over boats ahead of you. That move put you up into the windward shoreline and in lighter air. The correct move was to take the puffs low and move away from the windward shore. We got in two races which gave us a throwout race. Mary Anne and I were able to throw out our DNF and win the regatta.

Lake Lotawana is a great place to sail, I hope to see an even larger fleet next year!

## Do Not Buy ANY Boat Cover Until You Study This Comparison Chart

Sailors' Tailor	Competitors
Typically lasting 7-10 years	Industry norm is 5 years
PTFE Teflon thread at <b>NO UPCHARGE</b>	Chemically stripped polyester thread lasts 2-3 years
Unique waterproof Vinyl-like double-coated Poly Army Duck	Uncoated, or laminated fabric that delaminates & leaks
Flat-Felled seams double stitched through 4 layers	Single or chain stitched through 2 layers
Double-folded hems stitched through 3 layers	Turned-up hems stitched through 2 layers
Ample reinforcing over all stress points	Little or no reinforcing over wear spots
Stand-up flaps that snap around stays	Gaping opening or Velcro that fails at the first sign of grass
5/16" elastic shock cord in the hem AND tie downs	Tie downs or cotton draw cord
Supplied hardware	A trip to the hardware store

Skirted Mooring Cover is pictured.  
Also available: Traveling cover, Bottom cover, Cockpit cover.

20 YEARS OF EXCELLENCE

Regatta Results

MCSA Masters Championship  
Fleet 103-Indianapolis SC, IN, June

By Eric Hood

This week we held one of our class sanctioned major MC Championships of the year at one of our newest fleets. Fleet 103 Indianapolis Sailing Club was our host for the four day event. This club has a rich history of One-Design sailing with large fleets of Y-Flyers, Flying Scots, Highlanders, Snipes, Thistles, Lasers , Lightning's and many more classes. They also have a great junior program and also own their beautiful 14 acre property on Geist Reservoir. Their history is rich and their future is bright. If you have never been make sure you get with some of the new MC advocates there like Andy McDonald to check it all out.

The Regatta

Scheduled for six races but a huge high pressure system dominated the whole state of Indiana this week. Day 1 and Day 3 no racing. Our practice day was great and day two we got in three very fair but very light air races.

The Sailors

Thirty six teams were here for this year's Master Championship. Lighter than expected but when the Weather Channel gives you a predicted scorcher with light winds these things can happen. Some great sailors were here though. Past national champions from both MC and C Scow classes were present along with some great sailors from other classes just getting into the MC Class. So the sailing was with a tough group but also a fun group. Not the big dance but the warmup to the big dance if you will.

The Results

Wow, this was really cool to watch. Vince Driessen of Gull Lake with his new Melges MC 2701 won two of three races and probably would have won three of

three but in one race had to do a 720 in light air after some contact with another boat in front of the judges on race 2. Vince did not even hesitate and did his 720 with his typical great attitude. However, Ted Keller tied Vince up with his own great sailing performance and just placed second on the tie-breaker. Mike Considine of Pewaukee sailed a very good regatta and survived an unusual judges protest and hearing on kinetics. Eric Hood finished fourth and was top Grand Master. Katie Arvensen really sailed well and was our top Woman for the Masters Championship this year. Commodore Richard Blake was fifth overall and second Grand Master.

Lessons Learned

Velocity rules over direction (most of the time). This was all about sailing in the dark water for these three light air races. Even though we had tall tree lines what was showing on the water was what was happening. Sometimes in really hot conditions and high tree lines on a narrow lake the wind will not show on the water. So that was the case. You could see the breeze on the course all the time. That was critical because you had to make a choice. Direction or velocity. I think in the case of Ted and Vince they were the only ones who were able to mix both very well. Others of us had moments but those two really put it together. Second was not being out of place on the starting lines. They were very long and in light

EHood (Grand Masters Champion) and Vince Driessen Overall and Masters Champion

air this poses a huge risk. Most of the top ten sailors all three races could be found closer to the middle during these starts.

Other Regatta News

A great group of volunteers including some MC sailors not yet qualified for the Masters helped with this event. Regatta Chairman Dale Katzfey had a great crew for the whole event and were all honored at the awards ceremonies. Also, Andy McDonald thank you for the vision to bring the regatta to Indy and make it all happen.

Bill Crawford gave every sailor some incredible framed pictures. Bill's skills are incredible. Check it out at bill@harbor-pictures.com. Melges.com, MCSchow.org and others posted many of his pictures. In fact he has his own Facebook page and you can see some there.

In closing, great job to all at the Indianapolis Sailing Club. Thank you from all of us who participated this week. It was fun and very well done!!!

Lauderdale Lakes Senior Sailor - the Country's Oldest, Active, MC Member

Des Johnson, our Senior Sailor, has sailed with the Lauderdale Lakes Sailing Club for 40 years. We are located just north of Elkhorn, Wisconsin. We have 24 MC’s in our Fleet and Average 16-18 for our races on Sundays. In 2017, LLSC celebrated its 50 year anniversary.

Des has had a home on the Lakes since 1974 and recalls during a gas shortage and high prices, he thought about getting a sailboat. His first one was a forgettable little 10 footer with a main and a jib. He used that just to fool around with sailing. Later he got serious and bought a slightly used Chrysler Mutineer. It was a very nice boat and even included a spinnaker. The Club was sailing M-16’s at the time but we also had what we called the Handicap Fleet. It consisted of any sailboat that wasn’t an M-16. We had Butterfly’s and Sunfish, we had Hobie Cats and even a sailing canoe. From time to time a few wind surfers sail with us also. In the early 1990’s, Des bought a used MC and then he was really hooked. He sailed that boat until 1998 when he picked up a newer one. Over the years, Des always did well in our races. He’s been our oldest active sailor since the late 90’s. In fact, if you go to [www.lauderdalelakesailingclub.com](http://www.lauderdalelakesailingclub.com) you’ll see Des and his yellow sailboat on the front page.

When the sailing season ended, it got pretty dull around here so one year we discussed and decided we needed to get into that “hard water” sailing. A friend had a Lockey ice boat and it looked like a pretty simple rig. Des owned and operated a machine shop in Rockford IL for many years. He borrowed a Lockey off season and made one for me and one for himself. We found a place to sew up some sails for us by cutting the fabric from old sails we had. Seems to me, thinking about it, they were way too flat but we could sail. Des and I sailed those things for several years

until each of us decided that Florida was a better place to spend those months.

Des has been a sailor for a lot longer than he has been sailing sailboats. Des joined the Navy in 1942 and served for almost three years. He served on what is called an LCI, Landing Craft Infantry. These are not the Higgins boats that hit the beach on Normandy. These are much bigger flat bottom ship that could carry up to 200 infantry to the beach. His boat was in the Far East and actually before he got on board it had been converted to a Gun Boat carrying lots of firepower and was used as an auxiliary to cover shore-lines and protect smaller landing craft. It carried anti-aircraft gunnery and his ship tangled with many kamikazes. We thank him for his service to our Country.

Des enjoys the sailing but he says his body pays for it the next few days. During one windy race this season, we had about 6 boats go over but not Des. He doesn’t win as many races these days but with our handicap system he’s out there in the middle of the fleet. And, we definitely want to mention his two biggest fans and supporters – wife, Joan and daughter, Rita.

His fellow sailors have a saying that we shout out together at our social events. It goes like this: “When I grow up, I wanna be like Des.” We truly mean it. And did I mention, our Senior Sailor is 93 years old!

Long-time Friend and Sailing buddy – Peter Van Kampen
